

Evacuation Procedures

- Follow evacuation orders issued by local authorities without delay. Do not wait until the last minute to leave your home.
- Use designated evacuation routes and avoid shortcuts or unfamiliar roads that may be unsafe or impassable.
- If instructed to evacuate by foot, bring essential supplies, medications, and important documents with you.

Seek Safe Shelter

- Stay with friends, family, or in designated evacuation shelters if you cannot safely remain in your home.
- Avoid driving or walking through flooded areas, as water levels can rise rapidly and pose significant risks to life and property.
- If you encounter flooded roads or bridges, turn around and find an alternate route to safety.

After the Flood

- Wait for authorities to declare it safe to return home before attempting to re-enter flooded areas.
- Inspect your property for damage and document any losses or structural concerns for insurance purposes.
- Be cautious of potential hazards such as contaminated water, unstable buildings, and electrical hazards during cleanup and recovery efforts.
